

ALPHA TEST FILE REQUIREMENTS

NewAge Imagers accepts nearly every file format .
The preferred file format for ease of file transfer and file size is Adobe pdf.

E-mail files to jcampbell@newageimagers.com

Set the page size to 6" X 6"
Set the resolution to 1200 dpi
Include all fonts

Adjustment of these parameters is found under the 'properties' toolbar

In an email that accompanies the file please :

Tell us your cliché size if this is for a pad printing plate.

If you have screens or halftones tell us what screen frequency (lpi) you'd like
and any dot shape you may prefer (as a default we'll use 133 lpi and a euclidean dot)

Tell us of any special depth requirements you have for the plate. Some like the
screens shallow and the solids deeper; some print on fabric and need extra deep.
As a default we'll run 1 mil (25 microns)

GALE FORCE Imagers can run different depths on one plate. One micron depth
adjustment is achievable.

Provide us with an address where we can return the finished clichés with a contact name.

Maximum cliché size is 6" (150 mm) X 12" (300mm)

Maximum image area is 6" (150mm) X 6" (150mm)
